

# Balcony Butler

## MEASURING GUIDELINES

Adding one of our Balcony Butler fold-up tabletops is sure to complement your outdoor living area! To make the installation as easy as possible, we'd like to get a couple of measurements from you.

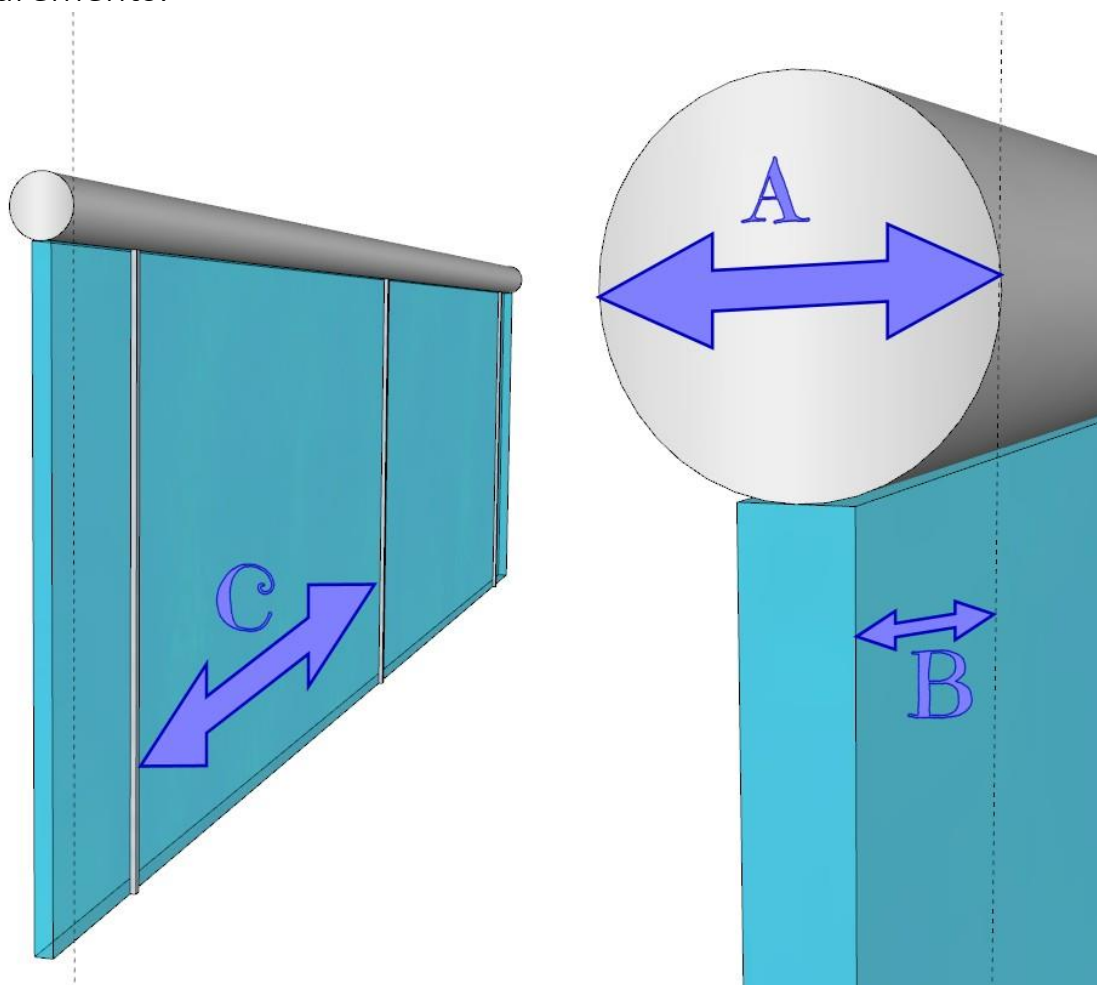

For Brick/solid balcony walls we need the two measurements shown on the drawing below (note "B" could be 0mm):

Railing Width (A): \_\_\_\_\_ mm

Railing Internal Overhang (B): \_\_\_\_\_ mm (zero if flush)

For Glass balconies, with round or square railings, we need three measurements:

Railing Diameter/Width (A): \_\_\_\_\_ mm  
Railing Internal Overhang (B): \_\_\_\_\_ mm  
Support Spacing (C): \_\_\_\_\_ mm (if applicable)

Please fill in the measurements in the fields above and email it to [sales@picnicbutler.com.au](mailto:sales@picnicbutler.com.au) and we'll be in touch to confirm the design.

Thanks again, and please feel free to contact us at any time to discuss any particular customisations you'd like to include.

Kind regards  
The Picnic Butler Team
